# Why Install HELLA LED Safety DayLights™?

In today's world, technology is enabling car drivers and enthusiasts to protect and keep themselves safe while driving on Roads. When you read the latest data about Road accidents in India with one death every 4 minutes and one accident every minute, it's a must for car owners to educate themselves about these safety equipment's and gadgets available in our market. Hella being one of the pioneers and technology leader in the field of Automotive lighting is focusing on improving "Visibility" on Roads as a key measure to ensure safer Roads in India. In their continuous efforts to contribute in the area of automotive lighting to reduce the road accidents in India by introducing high technology products, Hella India Independent Aftermarket has launched LED Safety DayLights™ for Indian Cars.

## HELLA LED Safety DayLights™ Maximise Your Vehicle Visibility

This high quality product from Hella India Lighting Ltd., comes with 5Yrs warranty on LED Lamps which has extremely low power consumption of 2W. The Hella LED Safety DayLights have structured lens which gives higher and better light output along with the dimming function. In our continuous efforts to provide better services to our customers, Hella is providing Free Fitment of LED Safety DayLights at the selected Premium retail outlets. This product comes with easy and simple installation, well appreciated by Electricians and customers.

**It is acknowledged from in-depth accident studies that failing to see another road user in time (or at all) is a contributing factor in over 50% of all daytime accidents. For daytime intersection accidents this increases to as much as 80%.**

Source: The Safety Effects of Daytime Running Lights, SWOV, 1997

The failure to see a car, truck or bus approaching, particularly at intersections, has been identified as one of the most significant factors in daytime accidents.

Designed to Increase the visibility (conspicuity) of your vehicle during daylight hours

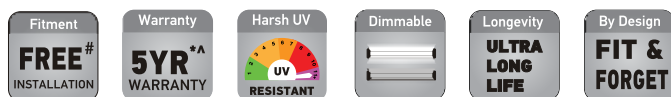

HELLA LED Safety DayLights™ are designed as forward facing signal lamps to enhance the visibility of your vehicle to other road users during daylight hours.

Safety DayLights™ are activated when the ignition is switched ON for a "never forget" safety enhancement and will automatically switch OFF when the headlamps or park lights are turned on.

Don't let other cars scare the daylights out of you, install HELLA LED Safety DayLights™.

For more information on LED Safety DayLights™ visit [www.safetydaylights.com](http://www.safetydaylights.com).

## HELLA LED Safety DayLights™ The Complete Range
